Education

University of Toronto June 2026

Honours Bachelor of Science in Mathematics

- Minor in Computer Science
- Minor in Business and Entrepreneurship

Experience

Junior Associate | Digital Delivery Risk and Corporate Services February 2026 – Present

Export Development Canada *Toronto, Ontario*

- Built an end-to-end **Planview API** pipeline for team capacity and planning data, implementing Bronze, Silver, and Gold transformations and SQL-driven Databricks dashboards to automate a monthly reporting process that previously required multiple days of manual work
- Developed a vulnerability pipeline ingesting **ServiceNow API** data into Databricks, mapping vulnerabilities to individual teams and serving curated data through Databricks SQL dashboards for **two teams**, reducing the manual effort required to categorize and assess vulnerabilities
- Automated engineering metrics reporting for **9 teams** by ingesting **Azure DevOps OData** into Databricks and computing cycle time, throughput, and finish ratio, reducing a monthly reporting workflow by approximately **1 week**
- Developed and enhanced **Agiloft REST API** endpoints supporting ServiceNow and enterprise records-management workflows; defined payload schemas and source-to-target field mappings, validated OAuth 2.0 authentication, and performed end-to-end integration testing across systems.
- Executed functional, regression, integration, and **UAT** testing for **FACT** platform enhancements and enterprise upgrades, validating business workflows, assignment logic, and cross-system behavior while documenting test evidence and supporting production readiness.

Software and Data Engineering Intern May – September 2025

HomeTrust/Fairstone Bank *Toronto, Ontario*

- Completed a 4-month scoped data integration project in 1 month by building Python and SQL scripts using **Pandas and Apache Spark** in Databricks to synchronize legacy onboarding files with production, accelerating delivery by **75%**
- Developed Python scripts using **OpenAI APIs** to extract data from scanned OCR appraisal documents, increasing information extraction accuracy by **97%**; collaborated with interns in Scrum meetings to iterate and deliver improvements
- Managed **Azure Data Lake** storage and integrated it with Databricks pipelines; built **Power BI** dashboards to monitor data flow and system health

Projects

Discover Me Website

Node.js, Next.js, React, JavaScript, OpenAI API, Vercel *February 2025*

- Built an AI-powered travel recommendation app using **Next.js, React, Node.js, and OpenAI API** to generate personalized destination recommendations from user personality quiz results
- Integrated **Google Maps and Street View APIs** for interactive destination exploration and deployed the application on **Vercel**

Skills

Languages: Python, SQL, Java, JavaScript, TypeScript, C
Quality & Integration: Functional Testing, Regression Testing, UAT, Integration Testing, Postman, REST APIs, OAuth 2.0, OpenAPI/Swagger
Data & Cloud: Databricks, Apache Spark, Azure, Azure DevOps Analytics, ServiceNow, Power BI, AWS
Development: Git, Docker, PostgreSQL, React, Next.js, Node.js, Pandas
